

SHE SLEEPS

tuning: cgcgcc

My wife is driving off to see our oldest girl to school
And then to run the errands on her list of things to do
With lullabies and pacifiers, I am staying home
And watching little Luci who is only two months old

She starts right into crying and won't let me put her down
So I hold her as we do our little dance around the house
But soon my aching back's complaining with my weary arms
So I finally lay down on the couch, and there upon my heart

She sleeps
She sleeps
She sleeps

Stillness is ten tiny fingers resting on my chest
Beauty is her two small cheeks, and every single breath
I know, somewhere are troubles, cares, that somewhere
armies march
But I never would believe it now, while here upon my heart

She sleeps
She sleeps
She sleeps

My hundred, one things to be done today are put on hold
I am watching little Luci who is only two months old
