

BEAUTIFUL CHILD OF THE WORLD

tuning: cgcgcc

You come from the time, time before time  
Before the universe was born  
When there was a seed that it was inside  
And then it all came crashing forth

You come from the great fire of stars  
They made the atoms in your bones  
They put a light inside of your heart  
They put a brightness in your soul

You come from a stone's uncanny desire  
The beautiful yearning of the Earth  
Beautiful longing to be alive  
Beautiful child of the world

You come from a vast family tree  
You come from the first life to appear  
You come from the land, you come from the sea  
You come from a thousand million years

You come from a fierce warrior's song  
A noble hunter's eyes  
You come from love tender and strong  
Compassionate and kind

You come from all the hopes and dreams  
That made your ancestors' hearts stir  
Their beautiful passions and beautiful schemes  
Beautiful child of the world

You come from laughter and from tears  
Beautiful unexpected turns  
From the sliver of chance that brought you here  
Beautiful child of the world

And you belong as much as the moon  
As much as the morning unfurled  
As much as the robin's beautiful tune  
Beautiful child of the world

And all of the thousand beautiful parts  
Of the story of your birth  
Are singing together the song that you are  
A beautiful child of the world
