

## IN OUR HANDS

standard tuning

The world was very big long ago  
The forests and the fields and the oceans  
Seemed to roll on forever  
If you could see beyond the horizon  
You'd never know what you'd find

And then as if before our very eyes  
The world began shrinking in size  
And we were closer together  
Until it seemed if we all reached out  
That we could reach the whole way around

### CHORUS:

And now it's so small  
So small that we have  
We have the whole  
World in our hands  
To carry with love  
And carry with care  
And give to tomorrow  
For all who live there

The world was very big long ago  
Stretching on so endlessly so  
That we never expected  
That it was just a speck floating by  
In an infinite sky

So now we know it isn't so vast  
The lovely little world in our grasp  
And everything is connected  
So every little good that we send  
Always comes back around again

### CHORUS:
